DATA QUALITY METRICS

Overall Score: 99.98/100

Dataset Health: Excellent

Data Completeness: 99.98%

OVERALL SCORE: 100/100

Dataset Health: Excellent

Missing Values : 2

Duplicate Rows : 0

Data Completeness : 99.98%

Executive Assessment

The dataset currently contains 0 duplicate records.

Data completeness is 99.98%.

Overall health status is Excellent with a Low risk profile.

Management attention is recommended before using this dataset for strategic decision-making.

Dataset Summary

Total Records: 4115

Total Columns: 2

Average Numeric Value: 0

Maximum Numeric Value: 0

Minimum Numeric Value: 0

Rows: 4115

Columns: 2

Missing Values: 2

Data Quality Report

Duplicate Rows: 0

Data Completeness: 99.98%

Quality Score : 99.98/100

Risk Level : Low

Dataset Health: Excellent

Categorical Column

KEY FINDINGS

- 1. Dataset contains 4115 records.
- 2. Data completeness is 99.98%.
- 3. Duplicate records found: 0.
- 4. The average numeric value of 0.00.
- 5. Dataset health status is Excellent.

Business Impact

- 1. The presence of 0 duplicate records can affect reporting accuracy.
- 2. Improving data quality can increase confidence in business decisions.
- 3. The current quality score of 99.98/100 suggests immediate attention is required.
- 4. Average numeric value is 0.00. indicates significant financial activity that requires accurate data for analysis.

AI Recommendations

- POSITIVE: Dataset completeness is excellent and suitable for advanced business analysis.

AI Business Insights

The dataset contains 4115 records with a completeness level of 99.98%.

No duplicate records were detected.

Average Numeric Value: 0, indicating the overall scale of numeric activity.

Current data quality score is 99.98/100 and the dataset health status is classified as Excellent.

Strategic Recommendation:

Organizations should prioritize data quality improvements before relying on this dataset for critical business decisions.

Risk Assessment:

Current risk level is LOW. Dataset quality is good.

Expected Outcome:

Removing duplicates and validating data quality can significantly improve reporting accuracy and decision-making confidence.

Data Cleaning Audit

Duplicates Found: 0

Duplicates Removed: 0

Missing Values Found: 2

Missing Values Fixed: 2

Remaining Missing Values: 0

Dataset was automatically cleaned by removing duplicate records and fixing missing values.
